About Me

I am an active 6th-semester student at Universitas Bina Sarana Informatika majoring in Software Engineering, currently pursuing a career as a Frontend Developer with a solid understanding of web development. During my studies, I have completed various projects including a hotel booking website (as my semester final project built with React.js), the Kingdom Cake website, Coffee Shop website, and a sales management application — most of which were developed using Laravel.

Skills

- Frontend Development : React.js (SPA, Hooks, Context), JavaScript, HTML5, CSS3, Bootstrap, Tailwind.
- Backend & API : Laravel (Blade, Eloquent), Python & Flask, REST API (Axios/Fetch), MySQL / MariaDB.
- Tools & Workflow : Git & GitHub, Postman, Trello, GitHub Projects, Agile/Scrum.
- Design & Communication : Figma (UI prototyping), Technical writing, Team collaboration, Presentation skills

Project

Hotel Booking Website – React.js
- Designed and developed a user interface for a hotel booking platform.
- Implemented responsive design for optimal experience on both desktop and mobile devices.
- Integrated modern design elements to enhance user convenience.

Kingdom Cake Website – CodeIgniter 3 & Flutter
- Developed an online store website with product catalog, ordering, and order tracking features.
- Optimized the system to simplify inventory and order management for administrators.
- Used CodeIgniter 3 for backend and Flutter for mobile app features.

Coffee Shop Website – CodeIgniter 3
- Created a website to promote a coffee shop with online ordering features.
- Provided product catalog, ordering, and online payment functionalities.

Pondok Pesantren Management Website – Laravel
- Developed a web-based system to manage student data, schedules, and activities at an Islamic boarding scho
- Integrated admin panel for easier data management and reporting.

AI Text Summarization Tool – React.js & Python
- Developed a tool that summarizes long texts using AI models.
- Focused on building a clean, intuitive frontend and integrating backend summarization logic.
